

THE BEAT GOES ON...

**KEEP THE BEAT ALIVE.
BE AN ORGAN DONOR.**

Like the powerful heartbeat of Mother Earth, we can feel how we are all connected. But what happens when another person's heartbeat weakens and an organ transplant could be the only life saving answer? If an organ donation is available, it could be a second chance at life for the organ recipient. But this won't happen unless you share your wish to donate with your family. Talk to your family. Let them know you want to be an organ donor.
